Abstract (en)

[origin: EP0949383A2] Each module has a holder (14,16) in the side for a water meter, and two cylindrical aligned sockets (10.1,10.2,12.2,12.2) at the ends for connection to a water pipe. The housing (10,12) is bent in the same planes between water meter holder and sockets, so that the centre of the meter holder is located next to the bending plane. A holder (18,20) for a shut-off valve is positioned next to the meter holder in a kink of the housing.
