Abstract (en)

[origin: EP0949450A2] The light has at least one light source (12), e.g. light bulb or an LED, which is arranged behind a lens (2) in a casing. The light source is arranged at the light edge (4), which preferably has a Z-shaped cross section. The light source is preferably formed by several LEDs. A number of LEDs (12) in series can be provided one behind the other along the light edge.
