Abstract (en)
[origin: EP0949478A2] The ribbed tubes (2) and connecting conduits (5) are incorporated into a housing that includes at least one cover plate (7) forming cavities (8,8',9), which include primary cavities (8,8') for receiving the tubes. A flow channel for a hot gas is formed inside the casing, having a cross-section which is greater in the tubes than between them. An Independent claim is also included for the cover plate.
