Abstract (en)

[origin: EP0949637A2] The system includes a SZ twisting unit for twisting the cores with alternate lay directions to form a twisted combination (5). A guide unit (9) is provided for as well as for the extruder head (7). The guide unit is arranged directly in the front of the extruder head (7). The guide unit (9) has at least one guide nipple (19,21) having a longitudinal bore (23). The longitudinal bore of the guide nipple is stepped.
