Abstract (en)

[origin: WO9829220A1] The invention relates to a percussion drill and/or jack hammer comprising a handle (14) that is spring-buffered against the hammer housing (12) and characterized in that it has at least one straight guiding track (20, 22) running parallel to the longitudinal axis of the hammer. The handle (14) can be moved to a limited extent along said guiding track in relation to the hammer housing (12) and is spring-buffered in such a way that its movement against the guiding track is limited on all sides.
