Abstract (en)

[origin: EP0950390A2] A portable seat supportable apparatus for relieving lower back pressure of a user is provided. In one embodiment, the seat supportable apparatus includes a back portion having a rib cage engagement assembly connected thereto, the rib cage engagement assembly removably engaging the rib cage of the user when he is sitting on the bottom portion, and user controlled elevating apparatus for selectably elevating the rib cage assembly, thereby to relieve lower back pressure of the user. In a further embodiment, the seat supportable apparatus includes a bottom portion for placing on a seat, the bottom portion for seating the user. <IMAGE>
