Abstract (en)
[origin: FR2776682A1] The synthetic material is in sheet form (1) and has a surface relief, made while it is hot, consisting of a series of non-straight grooves (2) forming ridges 3). The grooves can be formed so they are simply adjacent to one another, or they can join or intersect; they are set at regular or irregular intervals, and can in one direction or be grouped in different directions at 30 degrees or more to one another.
