Abstract (en)
[origin: EP0950774A2] The roof element (1) has longitudinal metal sheet sections (2) filled within an insulator (3) and arranged next to each other. A number of metal sections are fixed together by end-supported carrier sections (4) to a precast lay unit. The carrier sections have a C-shaped cross-section with an opening (6) in the front for an insulator filling (9).
