Abstract (en)

[origin: EP0950932A1] The timer shows hours (11) in a window (12) and minutes on a scale (4) included in a semicircular dial (5). The minutes are indicated by a disc (7) which carries two lozenge shaped indicators (8,9) and rotates continuously in one sense. The indicators are driven such that when one is indicating the other is retracted. The timer may be adapted to show other units of time and dates.
