Abstract (en)

[origin: EP0951104A2] Metal strip, bus bar-like conductors (11, 12) pass through slots (13) in individual socket end walls (4) in the lower section of the casing. The penetrations are upwardly open slots. The upper section of the casing includes tab-like wall sections engaging corresponding recesses in the lower section, their projections resting in the upwardly open slots.
