Abstract (en)

[origin: GB2330792A] A method of manufacturing a mouthpiece for a breathing apparatus comprises the steps of forming a mouthpiece blank with a dental impression, producing a mould 20 from the mouthpiece blank and then casting the mouthpiece from the mould 20. A kit for producing a mouthpiece comprises a blank capable of receiving a dental impression, a moulding flask and a keying member 12 arranged to support the blank within the flask when forming a mouthpiece mould and for forming an airway in the mouthpiece during moulding. The cast mouthpiece can be customised to a variety of dental profiles.
