Abstract (en)

[origin: WO9827159A1] This invention relates to polymer molding composition, containing: (a) a first polymer, including a polyester, a polycarbonate, or a mixture thereof; (b) a second polymer including at least one first alpha -olefin, at least one first alkyl acrylate, and at least one unsaturated epoxide; and (c) a third polymer including at least one second alpha -olefin and at least one second alkyl acrylate. The invention further relates to a thermoplastically-formed article prepared from the polymer molding compositions described above.
