Abstract (en)

[origin: WO9741487A1] The present invention relates to a method of producing with the aid of exposure a screened image of a picture (2) on the light-sensitive layer (6a) of film (6), plate, etc. The characterizing feature of the invention is that it incorporates utilization of at least one stochastic screen (5). This is located before the said film (6), plate, etc., on which the said screened image is intended to be created. The toner (5a) of the stochastic screen (5) is located in direct contact with the light-sensitive layer (6a) of the said film (6), plate, etc.
