Abstract (en)

[origin: WO9746986A1] The invention discloses a portable electronic transaction terminal, in particular a portable payment terminal, comprising a memory card reader (4, 5), a computer (8) for controlling the procedures for card control, user authentication and transaction with a remote server center, as well as remote linking means. The linking means comprise a cellular telephone circuit (7) incorporated in the said terminal housing (1), and the data acquisition means (3) as well as the display means (2) are common to the monetary function and to the telecommunication functions.
