Abstract (en)

[origin: WO9831195A1] The invention relates to a heating cable and a method of making it. The heating cable of the invention has at least one core of heat resistance conductors comprising at least one cold terminal length (6) and at least one heat conductor length (5), said core comprising at least two stranded electrical heat resistance conductors (1-4), the cold terminal length (6) of the heat conductor additionally comprising at least one low-ohmic cold cable which is inserted into the heating cable and which is in galvanic connection with at least one of the stranded heat resistance conductors (1-4).
