Abstract (en)
[origin: EP0951851A2] At least one goods support bracket (10) is combined with at least one bracket-receiving part (30). The bracket comprises a support section (12) and a polygonal insertion section (14) with a corner pointing vertically upwards which mates with the top edge of the bracket-receiving part by a diagonal locking action. The bracket-receiving part has a polygonal cross-section corresponding to that of the bracket insertion section, and a fastener section (32) for securing it to a wall or panel (60). Independent claims are also included for (a) The support bracket (b) The bracket-receiving part
