Abstract (en)

[origin: EP0951926A1] A ski binding has a support (14) for the leading end of the ski boot (11) at the ski, especially the leading end of the boot sole, from above and at the sides through a holder (39). The leading end of the boot is secured in place, and the boot heel (13) can be lifted clear. The housing of the holder, at the ski or binding, has a clamp behind the metatarsus (17), especially in or shortly in front of the arch of the foot, especially as a tensioning cable, clamping strip or clamping plate (39), etc..
