Abstract (en)

[origin: EP0951955A2] The device has a conveyor unit for the transporting of pallets (11) longitudinally and transversely to its longitudinal direction, and a delivery station (12) for delivering to the pallets aligned and cut to length reinforcement sections corresponding to the shape of the precast concrete parts to be produced. The delivery station has a fixed section (13) and a rotatable section (14), or an arc-shaped conveyor unit.
