Abstract (en)
The container consists of a base (1) and a cover (2) with a top (4) and side walls (5) made from an elastically deformable plastic material in contact with the product. The cover is bell-shaped, with side walls sloping at 1 - 10 degrees to the vertical, and convex at the top and the product is sealed inside it prior to use. The container consists of a base (1) and a cover (2) with a top (4) and side walls (5) made from an elastically deformable plastic material in contact with the product. The cover is bell-shaped, with side walls sloping at 1 - 10 degrees to the vertical, and convex at the top and the product is sealed inside it prior to use, leaving an gap between the seal (10) and the base which is filled with air or an inert gas. After opening the container, the product is expelled from it onto the base by squeezing the sides of the cover.

Abstract (fr)
Cloche de produit laitier comportant un socle (1) au dessus duquel se trouve une coiffe (2) ayant une paroi (4) supérieure et au moins une paroi (5) latérale, du produit laitier (3) d'un seul tenant étant en contact avec la paroi (4) supérieure et la ou les paroi(s) (5) latérale(s), une couche d'air étant prévue entre le produit laitier (3) d'un seul tenant et le socle (1), et la coiffe (2) étant en un matériau déformable classiquement. <IMAGE>
