Abstract (en)
[origin: EP0952265A2] The anchoring members (31,32,41,42) can be accommodated by the concrete post. By means of the housing (20), the baseplate (10) is divisible into several sections (11,12,13), whereby in the area of one section (11) the housing has a base (25). In the area of this base at least one anchoring member can be accommodated by the housing. The at least two sections of the base plate formed by the housing have at least one rear anchoring member (41,42). <??>The housing in plan-view is Y-shaped. Under the housing base (25) the bolt hole is arranged in the baseplate (10). The housing consists of two plates, running parallel to each other in the area of the rib. The anchoring members are concrete bars.
