Abstract (en)
[origin: EP0952281A2] The structure comprises numerous panels alongside each other, each having one or more flat panels (3) mounted on a base (2). The panels (3) extend telescopically upwards from the base (2), and can be of latticework, and can slide in vertical parallel guides (4) on the base, typically comprising travel rails and roller-type guides, and they can be motor-driven and typically with one or more motor-driven lifting spindles (6). The base can contain the drive mechanism, and can accommodate cladding material.
