Abstract (en)
[origin: EP0952295A2] A sealing system is provided for a housing defining a storage chamber having an opening formed in a wall structure with interior and exterior surfaces and an opening-defining edge connecting the surfaces and closable by a door. The sealing system includes a flexible gasket having a sealing portion and a U-shaped attachment portion disposed over the opening-defining edge, and a clip disposed about the attachment portion of the gasket and over the opening-defining edge, the clip removeably maintaining the gasket on the wall. The gasket has a substantially D-shaped sealing portion disposed between the door and the exterior surface and having a channel opening toward the center of the opening of the storage chamber. <IMAGE>
