Abstract (en)
[origin: WO9822005A1] A gravity feed merchandise dispensing device comprises at least one plastic track (30) capable of supporting in tandem a row of similar bottles (B) of the type having an annular neck flange (R), and has a lead bottle support basket (60) suspended at the front end of the track which is removable and interchangeable with other lead bottle supports so as to accommodate bottles of different heights. The rails (30) of the track have a sloped transition section (46a, 46b) at the front end of the track which eases movement of bottles off the track (30) and into the basket (60), and facilitates the front loading of bottles into the track.
