Abstract (en)
[origin: WO9825678A1] A transport apparatus (10) such as an amusement ride comprises a cable or rail member (11) from which in use, a passenger (12) is suspended in a carrier (15), the carrier (15) comprising a first part (16) which is in use, connected to the cable or rail member (11), and a second part (18) connected to the first part (16) by means of a hinge type arrangement, the second part (18) being thus movable relative to the first part (16) between an open condition in which a passenger (12) may mount the carrier (15) and a closed condition in which the passenger (12) may be transported.
