Abstract (en)

[origin: DE19648517A1] Method for the production of a multi-layer paint coating in which, according to the coil-coating method, a priming layer of a coating medium is applied to both sides of a coil made of sheetmetal and then burned in. Next, sheet metal parts are punched out from the coil and deformed according to the deep-drawing method, and, when necessary, several of these sheet metal parts are assembled into a construction, to which a colouring or effect basic paint layer from a coating medium is applied, which layer is fitted with one or more clear coatings.
