Abstract (en)

[origin: EP0953511A1] The bag has two faces (1a,1b) which are connected to each other around their edges with the exception of an open area. Each face has a sleeve (5) in which a sliding band (6) is arranged and a joint (7) that allows the sliding band to be gripped. In the middle part of the open area a cut out (8a,8b) is arranged in each face of the bag. The cut outs are of sufficient size to allow the hand of the user to transport the bag.
