Abstract (en)

[origin: EP0953530A2] The winder unit (1) has at least one support unit (4) which is formed by at least one support roller (5,6) which is located on its axis laterally in the machine frame. Stand arrangements (9,10) are provided on the axial ends of the support rollers. At least one lateral member (11,14,15) is formed as a seal box (11) which is located beneath the wider bed.
