Abstract (en)  
[origin: CA2269108A1] A spacing profile for a spacing frame, which is to be fitted in the edge area of a double-glazing unit, forming an interspace, with a profile body of material possessing low thermal conductivity and a metal layer, which is bonded to establish a form fit with the locating walls of the profile body intended for contact with the insides of the panes, is characterized in that in each of the locating walls of the profile body a recess is provided, in which is arranged the metal layer, so that the contact surface formed by the profile body and the contact surface formed by the metal layer lie essentially in one plane.
