Abstract (en)

[origin: EP0953818A1] The system has a loading transfer mechanism (28) transfers the ammunition in the magazine (2) to a loading section (5), and motorized unit for moving the ammunition to storage/transfer sections (2a,2b,2c,2d). Each of the transfer sections comprise a base support mechanism (12) on which the ammunition shells (3) are disposed with their axis perpendicular to the movement direction. There is a motorized belt (15) which allows munitions to be transferred to a loading section.
