Abstract (en)

[origin: EP0954066A2] The present invention relates to a positioning and locking method for a connector (2) intended to be surface-mounted on a printed circuit (6). The method according to the invention is characterized in that a positioning device (12) having a projecting part (16) which is intended to rest on the plane of the printed circuit (6) is forcibly inserted into at least a first slot (10) and a second slot (11), these slots lying on either side of the housing (4) of the connector (2). <IMAGE>
