Abstract (en)

[origin: WO9821997A1] The invention concerns a non-heating hair-curler comprising at least over 50 % of its usable length one single tapered body (1) with an end of small diameter and an end of large diameter, said tapered body (1) being extended to one of its end by a cylindrical or almost cylindrical body (2, 3) of substantially the same diameter. The invention also concerns a method for hair setting.
