Abstract (en)

[origin: WO9835933A1] Method of a chemical composition, which consists of quaternary ammonium salts benzyl - dimethyl - dodecyl (lauryl) ammonium chloride and benzyl - dimethyl tetradecyl (myristyl) ammonium chloride in a content of 5 % by weight totally, as well as on alcohols in a content of 2 % by weight totally, aromatizers in a content of 2 % by weight totally and deionized water in a content of 91 % by weight, which is used in a wide field of applications, such as disinfectant and cleansing means and as a synergistic material in industrial processings and in the agriculture.
