Abstract (en)

[origin: FR2771424A1] The smoothing iron has a heated sole plate (2), a reservoir (15) for a fabric conditioner, an applicator and a system (12, 14) with a mixing chamber (18) for diluting the additive, with a water chamber (7) connected to the additive reservoir to produce a diluted solution for applicator. The water chamber also supplies a steam generator (4), and the additive reservoir has an outlet (17) to release surplus pressure.
