Abstract (en)

[origin: WO9802615A1] A mobile work station, for the assembling and laying of pavement reinforcing bars, comprising a wheeled chassis (6, 7) adapted to travel a route along which a pavement is to be laid and carrying a longitudinal rod guide and spacing means (23) extending transversely of the chassis at or towards the front thereof. The chassis having an open topped magazine (15) adapted to hold a quantity of transverse rods (16) situated aft of said guide and spacing means, and apron means (20, 21) extending rearwardly and downwardly from said magazine over which a reinforcing mesh ribbon may slide for deposition behind the chassis as the chassis moves ahead.
