Abstract (en)
[origin: US2001054594A1] Display panel systems make it possible to access a wide range of information. Such systems have a stand and a support for swivel panels upon which information carriers can be placed. The present invention provides display panel systems by which information-carrying capacity of the system can be adjusted, as required. The stand is modular and has two side parts which can be combined with a variable number of intermediate parts, each of which having a support for swivel panels.
