Abstract (en)

[origin: FR2758932A1] The invention concerns a control device for photographing any person in front of an entrance door (3). The device is set in a subscriber's (1) house comprising control means for photographing any person standing in front of the entrance door (3). The digital camera (4) is a manually operated, it is connected to a subscriber processing unit, including a burglar-proof buffer memory (5) storing said photographs, said buffer memory (5) automatically addresses, by transmitting means (9), the photographs to a storing and archiving centre (6) connected to a whole set of devices. The invention is applicable to the security of persons and of property.
