Abstract (en)

[origin: EP0955172A1] The method involves arranging the object unfolded in a cassette (10) and conveying it to the marking station. The position of the edges of the page to be marked, in the station, and the position of a pattern on the sheet to be marked. The page is then marked such that parts of the marking are aligned with the pattern and other parts are aligned relative to the edge of the page. The cassette (10) has a base and a locating region and a frame (12). An Independent claim is included to cover a cassette for receiving the book or object.
