Abstract (en)
   A latch assembly for personal custody boxes is disclosed. The latch assembly has a main plate member (1) mounted to a door (8) and an auxiliary
   plate member (6) mounted to a doorframe (9) at a position opposite to the main plate member (1). The main plate member (1) includes a main
   part having one or more screw holes (3) and a locking hole (2). A bending part (5) is perpendicularly bent from one end of the main part and
   provided with one or more screw holes (3) so as to allow the main plate member (1) to be mounted to the door (8). In addition, a knob part (4) is
   perpendicularly bent from the other end of the main part in the same direction as the bending direction of the bending part (5) and convexed at its
   central portion. <IMAGE> <IMAGE>
