Abstract (en)

[origin: EP0955436A2] The top leaf (2) is linked by a horizontal swivel axis to the ceiling wall (1) of the main body. The bottom leaf (6) linked to the top leaf by supports (15) fixed near the outer corners is guided along guide rails (7) on the main body's side walls (8). The U-shaped guide rails are fixed to the narrow end sides of the side walls. The ends of the U-arms (9) of the guide rails are angled; the base of the U is joined to the end sides of the side walls. The support has a carriage part movably guided along the guide rail and joined to it by an insertion part matching the wedge-shaped or conical groove into which it fits. The holder has a release-control.
