Abstract (en)
[origin: WO9828495A1] The invention relates to a device for removing dirt adhering to the tire (2) of a roller used for compacting soil, and for spraying said tire (2) with water. The device, which comprises a scraping unit (5, 6) and a nozzle system (10, 11, 12), is characterized in that the scraping unit (5, 6) and the nozzle system (10, 11, 12) are joined into one modular component, and the scraper (6) forms a cavity (10) that is sealed off from a scraper support (5). A water supply pipe (11) leads into the cavity (10) from which nozzles (12) branch off through the wall of the scraper support (5).
