Abstract (en)
[origin: EP0956793A2] An inclinable support for chairs, oscillating or synchronized armchairs and similar furniture has a device of regulation of the suspension and of the seat inclination, by means of setting an inclination spring (8), that comprises: at least one inclined surface (14) between a fixed part (13) and a mobile part (10) in contact with the extremity of the said spring; at least one wedge (12) interposed between the fixed part and the mobile part with at least one inclined surface (15) complementary to and matching the inclined surface (14); and means for moving said wedge to cause said fixed and mobile parts to separate or come together. <IMAGE>
