Abstract (en)

[origin: EP0956886A1] Boot has a flexible sole (1) with a longitudinal groove (2) and four transverse bar fasteners (3,4). Interface has on boot side a trapezoidal casing (11,12) which engages without play in the boot groove, automatic locking fasteners (22,32) of the boot fastening bars. In the rear, the interface has an arm (26) with a connection (36) to the back of the boot heel which is used as an unlocking lever. The lower part of the interface has fixings (41,42) adapted to the snowboard.
