Abstract (en)

The invention relates to a carton (1) comprising top (10), bottom, left (11), right (12), front (13) and back (14) sides. Each of the left (11), right (12), front (13) and back (14) sides comprises a panel, whereby either of the left (110) or right (120) panels is associated along folding lines to both the back (140) and the front (130) panels. The top side (10) comprises an inner (100) and an outer (101) top panel, the inner top panel (100) being associated along folding lines to the front panel (130) and to a top flap (102), the folding line between the top flap (102) and the inner top panel (100) corresponding to the edge between top (10) and the back (14) sides, the outer top panel (101) being associated along a folding line to the back panel (140) and being comprised in a lid (2) having re-closing means (21, 22). The inner top panel (100) has opening means (3) in the region of the edge between the top (10) and the front (13) sides. <IMAGE>
