Abstract (en)

[origin: EP0957186A2] A melt duct (17) in a fixed part (11) leads to a duct (18) in a removable part (12). The sealing element (15) is a cylindrical, externally smooth component with a bore (16) fitted in a recess (19) in the removable part (12) without projecting into the fixed part (11). The sealing element (15) is made of a material with a higher coefficient of thermal expansion than the removable part (12).
