Abstract (en)
[origin: WO9708977A1] A dispenser for sweets comprises a container (1), which, at the top, has an opening (6) for filling sweets which can be covered by a lid (7) and which, at the bottom, presents a part (24) protruding from a front of the container for receiving limited amounts of sweets through a bottom opening (13) in the lower part of the container. A coarse threaded screw (15) being arranged in connection with the bottom opening (13) and having an operating device (18) within reach from the outside, by means of which the screw is, when necessary, rotatable so as to feed out sweets from the container. The feed screw (15) extends obliquely outwards/upwards from the opening (13) together with a chute (19) arranged under the screw on which sweets fed-out is forced to move upwards to a highest point (22) at a distance from the bottom opening before they finally fall down on the receiver part (24).
