Abstract (en)

[origin: WO9800138A1] A method for treating urinary incontinence, such as incontinence resulting from bladder detrusor muscle instability, using enantiomerically enriched (R)-clidinium. The method comprises administering a therapeutically effective amount of enantiomerically enriched (R)-clidinium, or a pharmaceutically acceptable salt thereof, substantially free of the (S)-clidinium enantiomer. Pharmaceutical compositions for the treatment of urinary incontinence comprising enantiomerically enriched (R)-clidinium, or a pharmaceutically acceptable salt thereof, and an acceptable carrier are also disclosed.
