Abstract (en)  
[origin: US6625915B1] An album page having at least one pair of parallel strips (5), which are joined to a substrate (1) in the longitudinal direction of the strips (5) and, at their mutually facing edges, have an unjoined region. The distance between the longitudinal joins is slightly greater than the extent in one direction of an object (6) to be held. In one embodiment the strips (5) are of the same length as the longitudinal edges of the substrate (1). In this way the album pages can be produced in a continuous process. The album page is preferably produced from the same materials (e.g., cardboard).
