Abstract (en)  
[origin: EP0958906A2] Modular, containerised mixing unit (1) for mixing concrete, cement or mortar, whereby all components, still separated, are conveyed in one component container (2a,2b). The container may be provided with an independent power source, with support legs, wheels or train wheels and can be used at substantially any location. For coupling a component container (2a,2b) to the container (1) an integrated hoisting device or a hydraulically driven centring device (3a,3b) can be used. <IMAGE>
