Abstract (en)

[origin: EP0958981A1] A housing (50) is arranged on the face side of each vehicle and accommodates the bellows (10) and bridge (30) of the transition half (1). The housing is closable. The bellows of each transition half has a support frame (40) which is displaceably located in the housing. This frame is equipped with rollers (41,42) and is supported in relation to the housing by an articulated lever (43). Each bellows has a coupling frame (20) for connection with the other bellows. The member bridge (30) is foldable around a horizontal axis into the housing.
