Abstract (en)
A pack having a first upper region (10) optionally having a pattern and an adjacent second upper region (11) optionally bearing a pattern which is in register with any pattern of the first upper region (10), and the pack also having an openable peelable seal (12). First and second upper regions (10,11) are formed from the same sheet of optionally patterned material with the sheet being slit to provide the first and second upper regions. The pack includes an additional strip (65) bonded by a seal (66) to the inside or outside of one of the first and second upper regions (60L,60R) of the pack and bonded by a peelable seal (67) to the inside or outside of the other of the first and second upper regions (60L,60R) of the pack, with any significant part (64) of the additional strip present on the outside of the first or second upper region (60L,60R) of the pack preferably being translucent or transparent, to allow any underlying pattern to be visible. <IMAGE>
